RESEARCH PARTICIPANTS NEEDED

Are you or someone you know an adult with Down Syndrome between 30 and 65 years old?

We're looking for adults with Down Syndrome (30-65 years old) and their caregivers/support people to take part in an exciting research study on spatial navigation and memory using fun games and tasks!

What Participation Involves:

- We will observe how adults with Down Syndrome navigate new places and use their memory through a series of games and tasks
- 2-3 days (about 4 hours total, with breaks)
- Flexible Locations: in-person (at our lab, home, a service provider site) OR virtually via Zoom
- To participate, caregivers/support people must be at least 18 years or older and willing to take part in the study
- Adults with Down Syndrome who complete the study will receive either a $120 gift card for in-person testing or a $100 gift card for virtual testing (both via Giftogram)

Why This Study Matters:

- 90%+ of people with Down Syndrome will develop dementia in their lifetime.
- Early signs are unique and often missed.
- Your help leads to better tools for earlier care and support.
- Shine a light on an underresearched community.

Interested?

To see if you qualify, please scan the QR code above to complete our short eligibility survey

For further information or questions, please contact the lab manager at **msuspatialdevlab@gmail.com** or Dr. Jennifer Yang at **yangyi@montclair.edu**

This study has been approved by the Montclair State University Institutional Review Board, MSU IRB #FY25-26-4877
